## Yacht Electrical Engineering

In addition to supporting all the major shipyards in the United Kingdom, Seaking Electrical Ltd carries out Turnkey projects for the commercial shipping and leisure yacht markets. Our design team can be called upon to discuss electrical specification with complete confidence, knowing that we have over 20 years of marine experience in dealing with the majority of Class societies such as RINA, Lloyds Register of Shipping, The Marine Contractors Association & Bureau Veritas.

The Seaking Vision is to be 1st in Class, that means that we shall maintain our investment in people. Through the process of continuous analysis & review we shall add to our services to meet the modern demands of these discerning market buyers of high capital investment and top of the range quality products.

This company stability enables us to offer continued technical and product support to the owner of the vessel long after machinery warranties have expired.

- Confidential design discussions
- Our attention to detail makes the difference

- Digital Technology
- Data & Communications
- Specialist Lighting Systems
- Entertainment Systems
- Motion Control
